

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A remote control device (RCD) comprising:
 - a first wireless interface for controlling and passing content data to one or more peripheral devices;
 - a second wireless interface for communicating with a mobile phone;
 - a speaker for outputting audio signals received from the mobile phone;
 - a microphone for receiving audio signals to be transmitted to the mobile phone; and
 - a processor for processing wireless signals and data communicated between the RCD and the mobile phone, wherein the RCD:

receives control signals and data from the mobile phone in response to the mobile phone receiving wireless control signals and data from a digital cellular network (DCN), wherein the data received by the RCD from the mobile phone is data selected from the group consisting of a text data signal, an audio data signal, a video data signal, and any combination thereof; and

~~processes the received control signals and data from the mobile phone~~ transmits the data received from the mobile phone to one of the one or more peripheral devices to be output.

2. (Previously presented) The RCD of claim 1 wherein the control signals and data received by the RCD from the mobile phone is an audio control signal and voice data used for establishing a telephone call.

3. (Previously presented) The RCD of claim 2 wherein processing the control signals and data received from the mobile phone comprises using the RCD to connect to a telephone call received by the mobile phone.

4. (Previously presented) The RCD of claim 3 wherein the RCD transmits the audio voice data received from the mobile phone to one of the one or more peripheral devices to be audibly output.

Claims 5 - 8. (Canceled)

9. (currently amended) A remote control device (RCD) communicable with a mobile phone and one or more peripheral devices, the RCD comprising:

means for controlling the mobile phone to:

process control signals and data received from the mobile phone, wherein the data received by the RCD from the mobile phone is data selected from the group consisting of a text data signal, an audio data signal, a video data signal, and any combination thereof;

output data received from the mobile phone;

handle an incoming telephone call received by the mobile phone from a digital cellular network (DCN); and

means for controlling and passing content data to the one or more peripheral devices such that data received from the mobile phone can be transmitted to the one or more peripheral devices.

10. (Previously presented) The RCD of claim 9 further comprising:
processing means for processing control signals and data received from the mobile

phone;

a speaker for outputting audio data received from the mobile phone; and

a microphone for inputting audio data to be sent to the mobile phone.

11. (Original) The RCD of claim 10 wherein the remote control device further comprises a user interface to control the output of data received from the mobile phone.

12. (Original) The RCD of claim 11 wherein the remote control device further comprises a video display to display video or text data received from the mobile phone.
